Why Forecast?

- Best Financial & Management Practices
- Required by Town's Charter, Section 4-2 (s)

Forecasting v. Budgeting

- Forecast provides a long-term and comprehensive financial perspective on service delivery using both known information & hypothesis (assumptions)
- Budget is a specific plan detailing service delivery in the coming fiscal year

Goals of Forecasting

- Gain a Long-term perspective/ basis for planning
- Determine whether fiscal problems are on the horizon
- Time to plan for change, favorable or unfavorable
- Reinforce the need for long-range considerations during the annual budget process

Forecasting- Key Concepts

- Projections are not inalterable prophecies, but merely guidelines which may be adjusted as necessary
- Once you develop baseline projections, it's relatively easy to adjust the underlying assumptions to address issues
- Forecasted shortfall does imply that some action will be taken, or at least planned, to avoid the financing problem
 - Action to balance the budget
 - Raise revenue; Reduce expense; Change the way you do business
